

Full Stack Engineering Intern

Role Summary:

As a Full Stack Engineering Intern, you'll contribute directly to building and improving SellStatic's platform. You'll work alongside our CTO and engineering team to implement features, fix bugs, and ensure a smooth experience for our users.

Responsibilities:

- Assist in developing and maintaining front-end and back-end features of the platform
- Work on integrations for content generation, scheduling, and analytics
- Debug and resolve technical issues to improve platform performance
- Collaborate with the CPO and Technical Project Manager to implement user feedback into product updates
- Contribute to building scalable, secure, and user-friendly systems
- Support beta product launches with feature development and testing

Preferred Skills & Qualifications:

- Proficiency in front-end and back-end frameworks (e.g., React, Node.js, Python, etc.)
- Experience with APIs, databases, and cloud platforms (AWS, Firebase, etc.)
- Problem-solving mindset and eagerness to learn
- Interest in SaaS, AI, or marketing technology
