

Job Posting: React Native Developer Intern at QuiikMart

quiikmart.com

Type: Paid internship

Location: Remote-friendly

Start: ASAP

Company Overview

QuiikMart connects customers to local ethnic and specialty grocers through a modern marketplace app. We are focused on reliable pickup, scheduled delivery, and a clean, fast mobile experience. **Passion & Grit > Perfect Resume. If you are hungry to learn, resilient, and obsessed with making customers happy, apply even if you do not tick every box.**

Position

We are seeking a **React Native Developer Intern** who ships, learns fast, and takes ownership. You will work on a live product used by real shoppers and merchants.

Key Responsibilities

- Ship features in **React Native + TypeScript** that improve reliability and UX.
- Implement instrumentation: **analytics events, error tracking, and logs**.
- Integrate REST endpoints and handle **network states, caching, and retries**.
- Write basic unit tests (**Jest/RTL**) and participate in **regular releases**.
- Collaborate with design and operations to turn feedback into product improvements.

Qualifications

- You have **shipped something real** such as an app, site, or library. Links required.

- Solid **React Native + TypeScript** fundamentals.
- Comfortable with **state management** such as React Query, Zustand, or Redux, plus navigation and forms.
- Good Git hygiene, clear PRs, and crisp commit messages.
- Ownership mindset and a bias to finish.

Preferred Skills

- Mobile performance debugging with profilers and memory tools, plus app store workflows.
- Familiarity with Postgres backed APIs and auth or OTP flows.
- Basic CI or CD exposure such as EAS or GitHub Actions.

What We Offer

- **Paid internship. No equity.**
- Real impact on a shipping product and mentorship from the core team.
- Flexible hours and a collaborative, no BS environment.

Application Process

Email **info@quiikmart.com** with the subject line: **React Native Developer Intern at QuiikMart**. Include: (1) resume, (2) links to shipped work such as GitHub, TestFlight, or Play Store, (3) two to three sentences on a tricky mobile bug you fixed, (4) why you want to join.

Join us in making this impactful mission and help bring home closer.
