General Information

This handbook outlines the steps that graduate students, graduate program staff and graduate faculty members need to take in order to proceed to an oral examination. This handbook was developed to serve as a guide to navigate the multi-step process that is involved and to ensure a smooth final step to degree completion.

To assist you with this process, this document contains embedded links, where applicable. We hope that they will assist you when you require additional information or immediate access to forms.

The information in this handbook has been adapted from the Faculty of Graduate Studies website.

We welcome your questions, feedback and recommendations and look forward to working with you to establish best practices in this area.
Step 1 - Verify Completion of Course Requirements

The oral examination for a Master’s thesis or Doctoral dissertation should be the last requirement for the completion of the graduate degree program. Graduate students should confirm with their supervisor, graduate program staff and/or graduate program director that they have completed their course requirements.

Step 2 - Thesis and Dissertation Proposal

All graduate students must prepare a thesis or dissertation proposal. This is normally in consultation with their supervisor. The proposal should contain a brief statement in non-technical language regarding the purpose of the thesis or dissertation, its relationship to existing work in the area, and the contribution which the student hopes to make in the advancement of knowledge in the field.

The proposal must include a title (which can be changed later, if necessary), the name of the supervisory and members of the supervisory committee. The recommended maximum length of the proposal is 3,500 words unless noted differently from the graduate program.

Approval Process

The student’s supervisory committee must approve the proposal. Following this approval, the student must submit one or more copies of the proposal to the Graduate Program Director. After confirming that the Faculty of Graduate Studies and internal program requirements have been met, the Graduate Program Director (GPD) or designate, is responsible for submitting the proposal to the Office of the Dean, Faculty of Graduate Studies (FGS).

All submissions must include a proposal and a TD1: Thesis/Dissertation Research Submission Form.

Below is a list of types of research and documents to submit. Links are embedded, where possible.

Thesis and Dissertation Handbook 4
Approval Timelines
For a master's thesis, the supervisory committee must review the student’s research proposal and recommend its approval not less than three months prior to the date set for the oral examination.

For a doctoral dissertation, the supervisory committee must review the student’s research proposal and recommend its approval not less than six months prior to the date set for the oral examination.

Office of Research Ethics

Organization and Technical Requirements
Before commencing the thesis or dissertation writing stage, students should consult with their supervisor and/or graduate program director regarding the preferred writing style and format for their program.

In addition to the above, students must conform to the standard components of a thesis or dissertation as outlined on the Faculty of Graduate Studies website. This webpage itemizes technical requirements which includes title page format, titling guidelines, abstract guidelines, etc.

Relevant Information and Websites
FGS Organization and Technical Requirements (Choose Master’s Thesis or Doctoral Dissertation)
Oral Examination
To begin the process of scheduling an oral examination, the master’s thesis proposal must be approved no less than three months prior to the date set for the oral examination and the doctoral dissertation proposal must be approved no less than six months prior to the date set for the oral examination.

Master’s thesis exam committee and approval process

Master’s thesis examining committee
At least three voting members, including the Chair.
- The Chair of the examining committee shall be chosen from among the voting members. The supervisor cannot serve as Chair of the examining committee.
- Two graduate faculty members chosen from the program. At least one of whom must be from the supervisory committee. If the student is co-supervised and both supervisors would like to participate in the examining committee, a third graduate faculty member must be chosen.
- One graduate faculty member at arm’s length from the thesis. Normally from outside of the program.

 Approval Timeline and Process
The supervisory committee must have read the thesis and agreed that it is ready to proceed to oral examination. In consultation with the Graduate Program Director, the supervisory committee must complete the Recommendation for Oral Examination Form no less than 20 business days the date set of the oral examination. This form must include the exam committee members as well as the date and location of the oral examination. If the information is not known or not listed on this form, it will not be approved by the Faculty of Graduate Studies.

No less than 15 business days before the date set for the oral examination, the Graduate Program Director must approve the form and forward the paperwork to the Faculty of Graduate Studies for final approval and copies of the master’s thesis, approved by the supervisory committee, must be distributed to the examining committee.

The student must be registered active in the term in which they defend and in any subsequent terms that they are completing their revisions.

Final Confirmation Prior to Oral Examination
A majority of the examining committee must agree that the thesis is examinable. Five business days prior to the scheduled oral examination, the graduate program director will poll the examining committee.

If the student does not receive a majority vote, the members of the examining committee who do not agree that the thesis is examinable are required to provide their reasons in writing to the student, supervisor and the Dean within five business days after the poll. In such cases, the oral examination is postponed for a period of no more than 12 months. The student also has the right to insist that the oral examination proceed as planned.
Doctoral dissertation exam committee and approval process

Doctoral dissertation examining committee
At least five voting members, including the Chair.

- The Chair of the examining committee shall be arm’s length from the supervision of the dissertation. The Chair is a representative for the Dean of the Faculty of Graduate Studies.
- One external examiner, from outside of York University. Must be arm’s length from the dissertation. Recommended by the graduate program director.
- One graduate faculty member at arm’s length from the dissertation. Normally from outside the program. Recommended by the graduate program director.
- Two graduate faculty members from the supervisory committee or one member from the supervisory committee and one graduate faculty member from the program. If the student is co-supervised and both supervisors would like to participate in the examining committee, a third graduate faculty member must be chosen.

Under rare, exceptional circumstances can an oral examination proceed in the absence of the external examiner and only with the permission of the Dean of Graduate Studies.

Approval Timeline and Process
The supervisory committee must have read the thesis and agreed that it is ready to proceed to oral examination. In consultation with the Graduate Program Director, the supervisory committee must complete the Recommendation for Oral Examination Form no less than 25 business days (approximately 6 weeks) the date set of the oral examination. This form must include the exam committee members as well as the date and location of the oral examination. If the information is not known or not listed on this form, it will not be approved by the Faculty of Graduate Studies.

External examiners are expected to be established academics, normally a graduate faculty member at another university. It is imperative that the student not have any contact with the external examiner. It is the responsibility of the Graduate Program Assistant or Graduate Program Director to distribute the dissertation to the external examiner. Upon approval of the external examiner, a formal letter will be written by the Faculty of Graduate Studies to the external examiner.

For external examiners’ expenses above $350, graduate programs must obtain approval. It is important to not invite external examiners unless approval has been obtained.

No less than 20 business days before the date set for the oral examination, the Graduate Program Director must approve the form and forward the paperwork to the Faculty of Graduate Studies for final approval and copies of the doctoral dissertation, approved by the supervisory committee, must be distributed to the examining committee.

The student must be registered active in the term in which they defend and in any subsequent terms that they are completing their revisions.
Final Confirmation Prior to Oral Examination

For both master’s thesis and doctoral dissertation, a majority of the examining committee must agree that the thesis or dissertation is examinable. Five business days prior to the scheduled oral examination, the graduate program director will poll the examining committee.

In addition to the above, for the doctoral dissertation, the external examiner will be asked to submit written comments five business days in advance of the oral examination. These comments will be made available to the student after the oral examination, with the external examiner’s permission.

If the student does not receive a majority vote, the members of the examining committee who do not agree that the thesis is examinable are required to provide their reasons in writing to the student, supervisor and the Dean within five business days after the poll. In such cases, the oral examination is postponed for a period of no more than 12 months. The student also has the right to insist that the oral examination proceed as planned.

Delay in Publication/Restricted Access

Normally, there are no restrictions on the publication of and access to theses and dissertations. In exceptional circumstances, students may request to restrict access to their thesis or dissertation for a maximum of 3 years. Please note that a 12-month request is usually considered the norm.

Valid reasons for delaying the publication include but are not limited to:

- A contract between the research sponsor and the University specifying a period of confidentiality. A proof of contract is required.
- Funding was provided by a sponsor who has required a delay in publication.
- Applying for a patent. A proof of application is required.
- Publication obligation in a contract.

To request a delay in publication, complete the Request to Delay Publication form. You will need to provide a rationale for the embargo request and submit supporting documentation from your supervisor, as well as any additional supporting documents.

Public Attendance at Oral Exams

The oral examination is a public academic event. Graduate students, faculty members and other persons may attend the oral examination. At the discretion of the Chair, the audience may participate in the questioning. Only members of the exam committee may be present for the evaluation and for the vote at the conclusion of the oral examination.
Oral Examination Outcomes

The examining committee determines the results of the oral examination. They report the results to the Office of the Dean, Faculty of Graduate Studies by using the Oral Examination Report Form. The form is signed by the Chair and should include details regarding any revisions under the comments section.

There are four outcomes that can result from the oral examination.

- **Accepted with No Revision**
  - The oral examination requirement is met if the Committee accepts the thesis or dissertation with no revisions.

- **Accepted Pending Specified Revisions**
  - The oral examination requirement is met if the Committee accepts the thesis or dissertation with specified revisions.
  - This specified revision could range from typographical errors or changes of a minor editorial nature, to specified insertions or deletions which do not radically modify the development/argument of the thesis or dissertation.
  - The Committee must specify such changes with precision. It is the responsibility of the supervisor to ensure that all such changes are made, and the Chair of the examining committee will confirm that this is the case.
  - Masters: In cases where there is one vote for major revision, specified revisions are expected.
  - Doctorate: In cases where there are no more than two votes for major revision or one vote for failure, specified revisions are expected.
  - Revisions must be completed within six months of the oral examination. Students must be registered active during this revision period and if the revisions extend to another term, the student is responsible to remain registered and pay tuition fees.

- **Referred Pending Major Revisions**
  - A thesis is referred for major revision if any of the following conditions exist:
    - the committee agrees that the thesis requires substantive changes to be acceptable; or,
    - there is a minimum of two votes for major revision; or,
    - there is one vote for failure.
  - A dissertation is referred for major revision if any of the following conditions exist:
    - the Committee agrees that the dissertation requires substantive changes to be acceptable; or,
    - there are two votes for failure; or,
    - there is one vote for failure plus a minimum of one vote for major revision; or,
    - there are at least three votes for major revision. In this situation, one of the following procedures, agreed upon by the Committee before the examination is adjourned, must be used to finalize the oral results: a. the Committee will reconvene within twelve months to continue the oral examination; or b. the revised thesis or dissertation will be circulated within twelve months to all members, who will inform the Chair and the Dean’s Representative whether they feel the stipulated requirements have been met. Detailed reasons for referring pending major revision must be supplied in writing by the Chair of the examining committee to the Dean, the Program Director and the candidate within two weeks. After an adjournment and when the major revisions have been completed, the thesis or dissertation is failed if there are two or more votes for failure. A thesis or dissertation cannot be referred for major revisions.
more than once and no further adjournment is permitted. In the event of failure, detailed reasons must be supplied in writing by the Chair of the examining committee to the Dean, Program Director and candidate within two weeks. Approval of major revisions must be reported to the Office of the Dean, Faculty of Graduate Studies by using the Revisions Approved Memorandum. This form can be sent to the Thesis and Dissertation Coordinator.

- Failed
  - Detailed reasons must be provided in writing by the Chair to the Dean of Graduate Studies, Faculty of Graduate Studies, graduate program director and student within 10 business days.

[Recommendation for Oral Examination Form]
[Oral Examination Report Form]
[Revisions Approved Memorandum]
Submission to Electronic Thesis Dissertation (ETD) platform

After the oral defense and completed revisions, if applicable, there is still another stage to fulfill in order to complete program requirements. Students must submit their thesis or dissertation electronically via the Electronic Thesis and Dissertation (ETD) platform.

A Thesis and Dissertation Coordinator will open an ETD record once the following documents have been received.

- Oral Examination Report (passed)
- Revisions Approved Memorandum, if applicable
- Library and Archives Canada Theses Non-Exclusive License Form, signed and dated
- Copies of copyright permissions, if applicable

Once an ETD record is opened, the student will receive an email with instructions on how to log in and how to complete their submission. The student provided their email address on the Recommendation for Oral Examination form.

To ensure a smooth upload, a few suggestions are noted below.

- Ensure that the thesis or dissertation follows the organization and technical requirements as outlined on the Faculty of Graduate Studies website.
- Ensure that your title page conforms to the FGS template.
- It is important for students to use this same email address as the Recommendation for Oral Examination form when they log in to the ETD.
- Review the instructions on the ETD platform.

The final step in submitting your thesis or dissertation is to agree to York University’s copyright license. By clicking “I Accept and Send for Review” you are confirming that your thesis or dissertation does not infringe on any rights of others and that you have the right to make the grant conferred by this copyright license. For more information, review the Submitting for Review section.

At any time, you can check the status of your submission by logging into the ETD. Click on the “Check Status” tab in the navigation tab.
After you submit on the ETD

Once you accept and “send for review”, your ETD will change from “Open” to “Under Review”. Once submitted you will not be able to make changes. A Thesis or Dissertation Coordinator will review your submission and you will receive a confirmation email informing you of this.

If you have made an error or have forgotten to include something, you can email the Thesis and Dissertation Coordinator to request that your record be re-opened. Please remember to include your student number in all correspondence.

After your submission has been reviewed, you will receive an email notifying you of one of two outcomes.

- Your submission has been approved and will be deposited to YorkSpace upon conferral of your degree or
- Your submission has formatting or other errors and has been returned to you for modification.

If your submission has been returned to you, your ETD record will be reopened to allow you to make the required changes and resubmit. The required changes to your PDF thesis or dissertation document will be outlined in an email to you. When your changes have been completed, replace the previously uploaded file with the updated one. You must click on “I Accept and Send to Review” on the “Submit to Review” tab to resubmit your thesis or dissertation. The process for reviewing the submission will begin again.

YorkSpace

YorkSpace is York University’s Open Access Institutional Repository (IR). Your thesis or dissertation will be deposited here after your degree is conferred. Please note that you retain copyright of your thesis or dissertation and may make it available on a personal website and pursue other sources of publication.
