Get ready for a Naan-Traditional placement experience!

We’re not your average bakery. We’re a team of passionate thinkers and doers that are challenging the idea of what a bakery can be. We operate like a startup, powered by creativity and a ‘roll up your sleeves’ mentality, to give our customers the best possible product.

Job Summary
The Data Science student will have the unique opportunity to work alongside experienced Data Scientists on real-world projects that directly impact our business. This role is designed to provide hands-on experience and exposure to various aspects of data science, including data analysis, machine learning, and statistical modeling.

Key Responsibilities
• Working closely with Data Science team researching on the latest technologies and state of the art of AI and ML models with the goal of importing them into the manufacturing industry
• Understand business requirements and develop AI driven solutions addressing those requirements
• Help with data collection from various automated and manual processes
• Analyze structured and unstructured data from various data sources, clean data, transform raw data into business insights by building ETL pipelines and visualization dashboards

Key Qualifications
• Tech-savvy, autonomous, eager to learn, and comfortable working in fast paced environment
• Education in data science, computer science, engineering, or analytical fields
• Knowledge in machine learning, data analysis and visualization
• Experience in software development, python, SQL and common data analysis packages, Tensorflow, sklearn, etc.
